

Co.Lab™ Youth Infusing System

Global Anti-Aging & ReFirming 3-Step System • Advanced Skimalism

Executive Summary & Market Positioning

The **Co.Lab™ Youth Infusing System** is an elite skincare ritual formulated and manufactured in cutting-edge Italian dermatological laboratories. Developed under the principles of **Clean Beauty** and **Skimalism**, this system replaces cluttered 7-to-8-step cosmetic routines with an optimized cascade of 3 multi-depth bioactives that guarantee three-dimensional hydration, urban barrier defense, and expression wrinkle softening via biomimetic peptides.

1. The 3-Step Pharmacodynamic Cascade

Unlike the uncoordinated layering of conventional cosmetics, the Youth Infusing System is formulated with progressive molecular weights and polarities to maximize cellular uptake without overwhelming the epidermal hydrolipidic mantle:

Phase / Product	Key Bioactives	Physiological Action & Benefit
Step 1: INFUSE Youth Infusing HA Serum (30 ml)	Proprietary HA6 Matrix (6 molecular weights of HA) + Vitamin E	Multi-depth water-binding replenishment. Ultra-low fractions permeate the dermis while high weights seal the epidermis.
Step 2: ACTIVATE Skincare Activating Mist (100 ml)	Extremophile Ectoin + Essential Triple Ceramide Complex	Creates a hydro-molecular anti-pollution shield, restores lipid cement, and re-activates hyaluronic reservoirs throughout the day.
Step 3: FIRM ReFirming Face Cream (50 ml)	Argireline® Amplified Peptide + Kakadu Plum + Cica	Relaxes muscular micro-tensions (non-invasive lifting effect), accelerates collagen synthesis, and provides noble barrier nourishment.

2. Phytochemistry and Bioactive Mechanisms

- **HA6-Matrix Complex (6 Molecular Weights):** Standard hyaluronic acid remains on the surface. The HA6 complex combines ultra-low molecular fractions (< 10 kDa), medium fractions (100 – 300 kDa), and high-weight polymers (> 1000 kDa), stimulating endogenous extracellular matrix replenishment, tissue volume, and prolonged elasticity.
- **Argireline® Amplified Peptide:** A next-generation biomimetic hexapeptide that targets the SNARE protein receptor complex. It attenuates facial micro-contractions, noticeably reducing the depth and volume of dynamic expression lines (crow's feet and forehead furrows).

- **Bioprotective Ectoin:** A natural extremolyte synthesized by saline desert microorganisms. Ectoin envelopes cells in a dense hydration shell, neutralizing cellular stress caused by UV radiation, HEV blue light, and urban airborne pollutants.
- **Australian Kakadu Plum:** Recognized botanically as the world's highest natural source of Vitamin C (up to 100 times more concentrated than oranges), delivering potent antioxidant defense and stimulating active collagen biosynthesis in dermal fibroblasts.
- **Purified Madecassoside (Cica / Centella Asiatica):** Premium botanical fraction that down-regulates pro-inflammatory mediators and accelerates epidermal barrier restoration in sensitive or reactive skin.

3. Twice-Daily Usage Protocol (Morning & Night)

For optimal and sustained clinical results, apply twice daily onto thoroughly cleansed skin:

- 1. Step 1 (Serum):** Dispense 3 to 4 drops of *Youth Infusing HA Face Serum* onto fingertips and gently press into face, neck, and décolleté until completely absorbed without mechanical friction.
- 2. Step 2 (Mist):** Hold *Skincare Activating Face Mist* approximately 20 cm away from face with eyes closed and mist generously. Allow to air-dry to activate the hyaluronic matrix. *Note: Can also be sprayed over makeup during the day for an instant barrier refresh.*
- 3. Step 3 (Cream):** Warm a moderate amount of *ReFirming Face Cream* between palms and massage in upward strokes from the center of the face outward, locking in bioactives with lipid protection.

Elite Synergy at Opportunity Shop: The "Inside-Out Beauty" Protocol

True skin longevity reaches its physiological peak when topical dermocosmetics are paired with systemic nutritional bioactives:

- **From Within (Morning):** Take 3 scoops of **Co.Lab EverGlow** hydrolyzed marine collagen, providing amino acid peptides and white tomato extract to protect dermal fibers via microcirculation.
- **From Without (Morning & Night):** Apply the **Youth Infusing System** to lock in multi-layer water, rebuild ceramides, and visibly smooth facial lines with biomimetic peptides.

4. Technical Assurance, Clean Standards & FAQs

- **European Clean Beauty Standards:** Manufactured in Italy under stringent Good Manufacturing Practices (GMP). 100% free from parabens, harsh sulfates, mineral oils, phthalates, and synthetic irritants. Never tested on animals (*Cruelty-Free*).
- **Suitable for sensitive skin?** Yes. The formula features Ectoin and Madecassoside to calm reactivity and soothe erythema, making it exceptionally well-tolerated by rosacea-prone or sensitive complexions.

- **Time to visible results?** Immediate plumping and radiant hydration are noticeable from the first application. Measurable firming and expression line softening consolidate between the 2nd and 4th week of consistent twice-daily use.
